OBJECTIVE

A software developer with a strong foundation in web technologies and data structures and algorithms, seeking an opportunity to apply problem-solving skills and build efficient, user-friendly web applications.

EDUCATION

B V Raju Institute Of Technology, Narsapur
Bachelor of Technology in Information Technology

Aug 2023 – Apr 2027
CGPA: 8.92

Krishnaveni Junior College
Intermediate

2021 – 2023
CGPA: 9.49

PROJECTS

Optimized Machine Learning Framework for Phishing URL Detection | [LINK](#)

Technologies: Python, Scikit-learn, XGBoost, SHAP, Streamlit

- Developed a machine learning model to detect phishing URLs using extracted URL-based features.
- Compared Random Forest and XGBoost models and optimized performance using RandomizedSearchCV.
- Integrated SHAP for explainable AI and built a Streamlit interface for real-time phishing URL prediction.

College Events and Sports Hub | [LINK](#)

Technologies: HTML, CSS, JavaScript, Python, Flask

- Developed a web-based platform to manage college sports and events with real-time slot availability.
- Implemented responsive UI and backend services for seamless scheduling, booking, and updates.
- Enabled dynamic slot booking, event tracking, and real-time data handling using Flask.

TECHNICAL SKILLS

Languages: C, C++, Python

Technologies & Frameworks: HTML, CSS, JavaScript, Flask

Databases: SQL

CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Soft Skills: Communication, Problem-Solving, Teamwork, Time Management

CERTIFICATIONS

- **Smart Interviews** – Smart Coder (DSA Certification).
- Successfully Completed **Salesforce Certified Agent Force Specialist**.
- Completed **Programming in Modern C++ and Python** by NPTEL.
- Participated in **HACKFINITI** – 24-hour hackathon at **BVRIT**.
- **Frontend with JavaScript** Certification by TASK.
